

Dear Reviewer,

I've been working on an update of the taxon/DPS component of the SRKW status at the request of the NWR (requesting memo attached). They are responding to a delisting petition received last summer questioning the validity of the NP resident subspecies. Would you have time to give the draft status review a read through? If so, please let me know and I'll send you a copy of the draft. I'm also setting up a google folder with a copy of the petition and the public comments, in case you want to look at those. I need to get the status review back to the NWR by June 21, so ideally comments by June 7th would be most useful.

I will also be contacting the other available members of the 2004 BRT to see if they want to review it, but want to call them first to give them a heads up. In the meantime, please do not distribute the draft.

Please do not hesitate to give me a call if you have any questions or want to seek clarification on any specific points.

Thanks,
Mike
